FUNDING PROCESS

Step 1

Assessment. We work with your lawyer to assess your case and determine the amount of funding needed to run to completion.

Step 2

Funding Terms. We issue a Funding Agreement which sets out everything you need to know about your funding.

Step 3

Funded Case. Your lawyer invoices every month on agreed terms and we pay those invoices on your behalf.

Step 4

Case Completion When you receive your payout from your case, we are paid a one time funding fee.

COST OF FUNDING

The Funding Fee is only charged one time at the end of your matter when you receive your payout. Upon successful completion of your matter we are paid back the total amount we paid to run your matter; plus a Funding Fee which is a percentage of the payout you receive.

The Funding Fee is set at the start of your case and is based on the expected cost of running your matter, running time, the expected claim size and risk profile of your case.

Case Example*

Size of claim	\$500,000
Cost to run matter	\$50,000
Time to settle	6 months
Prospects of success	Good
Funding Fee	5%

* Example only. Funding Fee may differ depending upon expected: time to complete, running cost, size of claim and other factors determined by funder. Funding terms subject to funder approval
